

Total-Biotics® Supports:

- Complete Digestion
- Improved Iron Absorption
- Healthy Energy Levels
- Normal Bacterial Balance
- Control of Excess Gas
- Manufacture of B Vitamins
- Immune System Function
- Reduce Food Intolerance
- Improved Breath Odor

Total-Biotics® is designed for daily use to aid digestion and support a normal immune response. It can also be used in larger amounts to replace the normal pro-biotic balance in times of excess stress. Many things can destroy the intestinal bacterial balance: Stress, poor diet, pollutants, environmental changes and prescription drugs. Over use of antibiotics also destroys the beneficial bacteria as well as bad bacteria. These imbalances or shortcomings can contribute to a host of problems like vomiting, loose stool, poor nutrient absorption, dull coat, low energy and more.

Pets with large amounts of beneficial bacteria are better equipped to fight the growth of unhealthy organisms. So, if pets are to maintain a healthy body, they need large quantities of friendly bacteria. Total-Biotics® supplies just the right amount of eleven different species of Pro-Biotics matched to how much food your pet eats.

Total-Biotics® gives you a unique advantage not available from anyone else. Total-Biotics® utilizes L.E.A.D.S.® which stands for "Live Enzyme Activated Delivery System®". This special enzyme delivery system first used in human nutrition is now available for your pet. It insures nutrient delivery on a cellular level. Total-Biotics® uses only human grade pro-biotics, enzymes and patented amino acid chelated minerals. For superior results use the companion digestive aid Total-Zymes® along with Total-Biotics® and give your pet every advantage for a long and healthy life.
